Blurred lines – how can technology transform global trade?

Vipul Sardana
Maersk Trade Finance
Feb 2nd, 2018
Major shifts that will determine our future

- Technological advances
- Global warming
- Demographic shift
- Shift in global economic power
- Resource scarcity
Data is the new ‘OIL’

30 TB of data is transmitted by the Maersk Line fleet over satellite link each month
Digitisation - Building solutions for our customers

As the global integrator of container logistics, we aim to connect and simplify our customers’ supply chains
Maersk 2018:
The freight and finance for your trade
